# GUARD MILES+

MAKE YOUR POWDER  
GO THE EXTRA MILE

POWDER COATING

# FOR A DEMANDING INDUSTRY

From refrigerators, washing machines, cookers and air conditioning units to interior lighting, satellite dishes and electrical cabinets – the list of appliances and devices that we use is long, and their presence in our lives is ubiquitous. As manufacturers of these essentials, we realise that you are producing at a rapid pace while being conscious of the quality of your output. You have your eye on operational efficiencies and higher productivity while you look for product solutions that offer tough protection from corrosive elements.

# A COATING THAT GIVES YOU MORE AND MORE

Should you compromise between higher productivity and greater protection? Would you sacrifice cost savings to manufacture products that perform? We don't think so. In a highly competitive market, efficiencies play a big role and your reputation is built on the products you deliver. Which is why we've created Guard Miles+, a range of powder coatings designed to give you more mileage, production efficiencies and a great finish while giving your appliances optimum protection.

# MADE TO ENHANCE YOUR OPERATIONAL EFFICIENCY

The most important indicator of operational efficiency is surface mileage. With Guard Miles+ you can coat more with the same amount of powder, and it offers you the same level of hiding power at lower thickness compared to other standard powder products. With flexible curing schedules, Guard Miles+ can be used with your standard application equipment. It is easy to clean, and is available in a range of selected colours.

Choose from four intuitively designed powder coating solutions that best suit your needs:

## **GUARD MILES+ D**

Best suited for refrigerators, shop fittings, interior lighting and industrial racking, this range delivers optimum operational efficiency without increasing application complexity.

## **GUARD MILES+ E**

Ideal for electrical cabinets, satellite dishes and air conditioning units with optimal protection against UV rays, varying air temperatures and harmful humidity.

## **GUARD MILES+ H**

Works best for cookers, microwave ovens and panel radiators as it protects your appliances against heat generated yellowing.

## **GUARD MILES+ W**

Made for wet appliances, this range protects your washing machines and dishwashers against humidity and the chemical effects of detergents.

# A WHOLE WORLD OF APPLICATIONS

With Guard Miles+ you get a uniform and lower average film thickness, with improved coating levelling and better powder penetration into corners and recesses. This makes it ideal for those who produce refrigerators, freezers, microwave ovens, cookers, dishwashers, washing machines, heating radiators and air conditioners. The versatility of Guard Miles+ means it can also be used for shop fittings, interior lighting, industrial racking, satellite dishes, electrical cabinets and much more.

# IMPROVING THE WORLD WE SHARE

This product isn't just a step towards protecting your goods, it's also a step towards creating a better environment. By choosing Guard Miles+, you'll be joining our GreenSteps programme on a journey to a greener, more responsible world.

Our stringent production methods, processes and innovation ensures:

- 

An environment-friendly, solvent-free product
- 

Lower carbon footprint and VOC emissions
- 

Reduction in energy consumption and hazardous materials
- 

Minimal waste by recycling unused or overused powder
